

tendal[®] WINDOW CLEANING

CLEANING

For best results, your windows should be cool before cleaning, i.e., they should not have been exposed to heat (from the sun or other sources). Make sure that all dust, sand and gravel have been removed from all parts of the frame. We recommend using the soft brush of your vacuum cleaner.

Our windows are spring-loaded and can be easily removed from the tracks. Simply wipe the windows with a soft cloth and a mixture of lukewarm water and a mild detergent such as Woolite. Do not use cleaning products containing bleach, chlorine or ammonia.
